Take control

Storage is your network's most costly component. How can you manage it effectively if you don't know what's going on? NTP Software QFS Web Reports provides you with the information necessary to actively control and monitor the use of storage in your environment. Experience an immediate return-on-investment by uncovering problem areas that are consuming valuable disk space.

"Storage management is brutally difficult, especially in NT shops where you have lots of nodes... [NTP Software] represents a significant part of storage resource management..."

-Steve Duplessie
Enterprise Storage

Internet Week

Server Growth Projection

Server	3/1/2003	3/8/2003	3/15/2003	3/22/2003	3/29/2003
NTPS11462	4.29	4.64	4.55	4.88	5.14

"The amount of corporate data is doubling every 6 months. By 2002, enterprises will be consuming 1.4 million TBs of storage annually, 12 times the amount consumed in 1998."

See the present and predict the future

One of the keys to storage management success is to know where you are going, not just where you have been. The QFS Web Reports will show usage trends by server and make forward projections allowing you to predict your future storage requirements.

Easy Installation

The QFS Web Reports installs via a wizard for rapid deployment. In a matter of minutes you will have access to over 100 pre-defined reports without the huge deployment costs associated with other report offerings.

Flexibility and Scalability

The open architecture of the QFS Web Reports provides the flexibility of using your database of choice to scale with your performance requirements. Additionally, simplicity of the installation enables rapid deployment and problem free scalability within an your WIndows storage envi ronment.

"NTP Software is perhaps one of the better-kept secrets in the SRM/Quota management space... If you don't know them, it is worth taking a look when evaluating SRM and Quota management applications."

-Nancy Marrone

QFS Web Reports™

NTP Software QFS Web Reports Specifications

File System Reports
- Server and volume information
- Usage by user
- Duplicates and aging reports
- Trending analysis

Reporting Flexibility
- Web-based object reports library
- Usage by user
- Status by server, volume
- Available via browser
- Can be integrated with your Intranet or other applications
- Can aggregate users across files systems

Analysis
- Provides summary, detail, and drill-down views
- Includes trending and forward projection
- Raw data available via database for other calculations

Enterprise ready
- Automatically handles missing and discovered systems

General Features
- Database independent (includes embedded, royalty-free database technology, or you can use your existing database technology)
- Works with all Windows file systems
- Reports published as Microsoft .net web services
- Integrated with NTP Software's Quota & File Sentinel

Reporting Server Requirements

Operating System:	Disk space:	Memory:
Windows 2000/2003 Microsoft .Net framework	2.5 GB	256 MB of RAM

Agent Install Requirements

Operating System:	Disk space:	Memory:
Windows NT / 2000 / 2003	5 MB	32 MB of RAM
