

NTP Software Storage M&A™ Family of Products

"NTP Software is perhaps one of the better-kept secrets in the SRM/quota management space [...] it is worth taking a look at when evaluating SRM and quota management applications."

~ Nancy Marone, Senior Analyst
Enterprise Storage Group

Product Overview

Critical Insights

NTP Software Storage M&A provides you with the means to actively monitor and fully understand *all* the critical details of your storage environment, including overall risk.

With NTP Software Storage M&A, you will learn what percentage of your network storage is consumed by duplicate, abandoned, or even illegal files; understand usage trends; make forward projections to predict future storage requirements; and measure and trend your overall exposure to risk.

Product Benefits

Risk Index

Measuring and quantifying hundreds of key indicators, the Risk Index boils down your exposure to one number that gauges your network's integrity over time. With the Risk Index, you will learn whether you're making progress or if your situation needs immediate intervention.

The Knowledge and Insight You Need

Key Benefits

- Measure progress: Learn how well you're managing your storage infrastructure
- Improve uptime: Know in advance when and where potential problems may arise
- Gain confidence: Accurately plan future storage needs across your enterprise
- Reduce risk: Discover the location of illegal or forbidden files

Key Features

- Risk index measurement with powerful web-based reporting
- Configure and customize views to isolate the information you need
- Drill down into critical details, create and store action item reports

Building Structure Around Storage

“NTP Software Storage M&A tells me exactly what is going on all over my storage environment. Across the country and cross platform, I’m able to see it all.”

~ Drew Halson, Network Administrator
Geoffrey Lyons & Associates

Benefits (continued)

Robust Reporting

NTP Software Storage M&A allows you to drill down into all the levels of your organization and get to the details. You can run reports on every aspect important to management.

Problem Identification

NTP Software Storage M&A allows network administrators to predict potential bottlenecks, foresee storage outages, and discover exposure points. The most beneficial aspect is the ability to anticipate problems *before* they arise.

About NTP Software

NTP Software is the worldwide leader in user-focused, policy-based storage management. We create platform-independent products that enable companies to automatically control the compliance, access, quotas, and lifespan of their users’ stored files. NTP Software solutions also gather the analysis and planning data necessary for both short-term and long-term decision making, providing everything necessary to actively control all aspects of a user’s interaction with local and shared storage.

Features (continued)

Filesystem Reports

- Server and volume information
- Usage by user
- Duplicate file and aging reports
- Trending analysis

Reporting Flexibility

- Web-based object reports library
- Status by server or volume
- Available via browser
- Integrates with intranet and applications

Analysis

- Provides summary, detail, and drill-down views
- Includes trending and forward projection
- Raw data available via database for other calculations

Technical Specifications

Reporting Server Requirements

- Windows 2000 or 2003
- Microsoft .NET Framework 1.1
- 2.5GB disk space
- 256MB RAM

Agent Install Requirements

- Windows NT, 2000, or 2003
- 5MB disk space
- 32MB RAM

Supported Platforms

NTP Software Storage M&A for NAS™

- Dell™ PowerVault™ Edition
- EMC™ NetWin™ Edition
- HP Storage Server Edition
- IBM® Storage Server Edition
- NetApp® Edition (all Filers)

NTP Software Storage M&A for SAN™

- Windows® Host

NTP Software Storage M&A for RAID / DAS™

- Windows® Host

NTP Software supports additional platforms not listed above. To find out if your platform is supported, contact one of our sales representatives today.
